

"The next AI economy will not be won by people with the most prompts. It will be won by people with the most **defendable assets**."

THE CERTIFICATION STANDARD FOR AI ASSETS · THE DEED OFFICE FOR THE DEFENDABLE AI ASSET ECONOMY

The deed on every AI asset that matters.

Defendable.eth is the trust protocol for AI work that can be proven, transferred, audited, and sold. Seven asset classes. One standard. Every receipt on chain.

The trust-mark playbook NOT A NEW CATEGORY — A PROVEN ONE

GIA · Diamonds graded by GIA trade at 20–40% premium. GIA sells the grading, not the gem.

UL · Default purchase choice for procurement, insurance, code compliance.

Energy Star · Tax credits, rebates, state procurement preferences anchor on the mark.

Visa · Banks pay to issue under the standard. Trust travels between parties who never meet.

What Defendable owns SEVEN ASSET CLASSES · SEVEN WORDMARKS

Defendable datasets
Curated training corpora · cell-level lineage · tier-graded · re-licensable.

Defendable models
Fine-tunes with base-model lineage · training recipe · eval harness · weight hash.

Defendable evaluations
Tribunal scorecards · independent-judge agreement · falsifiable benchmarks.

Defendable agents
Production agents · output lineage · drift logs · operator identity.

Defendable compute
Cook flightsheet · power lineage · rig integrity · MicroScaler-attested.

Defendable sales
Asset manifest · buyer/seller terms · usage rights · settlement proof.

Defendable deeds
The exclusivity claim itself · sold once · on-chain transfer · custody record.

One protocol
Same proof discipline across all seven. Different lineage attributes per class.

What a deeded sale transfers EIGHT ITEMS, EVERY DEED, EVERY TIME

01 Asset manifest
Component list, counts, hashes.

02 Hash receipt
sha256 of canonical payload.

03 Provenance trail
Source · curator · Tribunal log.

04 Buyer/seller terms
Counterparty identities, obligations.

05 Usage rights
Exclusive vs non-exclusive, field-of-use.

06 Delivery receipt
Confirmation, timestamp, hash match.

07 Settlement proof
BTC/USDC tx or Stripe clearing record.

08 Post-sale custody
Who holds what, escrow, audit handoff.

What the deed does to price DEEDED SETS TRANSACT AT PREMIUM

NON-EXCLUSIVE LICENSE · THE FLOOR

From \$0.18 / cell

Recent comparable: 240,423 CRE training cells transferred non-exclusively on 2026-05-19, \$42,300 settled in Bitcoin — **the first public deeded AI asset sale**. Buyer received the data; deed retained by Swarm. Corpus stays in active inventory.

DEEDED SET · THE ASSET

Premium · by inquiry

The deed transfers exclusivity. Your model can be marketed as trained on a one-of-one corpus. Priced per slice, sold once, anchored on chain, re-sellable as a downstream asset.

Talk to Defendable.

Regulated AI (pharma · healthcare · defense · fintech) · frontier labs · enterprise procurement · franchise candidates. Same desk · same-day response.
